EXTRAS BEYOND SCOPE

What was asked for, module by module

Onyx Learn 6 of 6 requirements · all delivered

LRN-01	Course Catalog & Enrollment P0 Structured catalog mapped to programs and semesters with self-service and administrator-driven enrollment.	● DELIVERED
LRN-02	Content Delivery P0 Streaming video, documents and resumable lessons with per-learner progress tracking and offline-friendly resources.	● DELIVERED
LRN-03	Attendance Tracking P0 Session attendance capture via QR or manual roster with per-learner and per-cohort attendance analytics.	● DELIVERED
LRN-04	Assignment Workflows P0 Create, submit, grade and return assignments with rubrics, deadline handling and structured feedback.	● DELIVERED
LRN-05	Learning Progress Dashboard P1 Personalized progress, streaks and next-best-action nudges that keep learners oriented toward outcomes.	● DELIVERED
LRN-06	Discussion & Doubt Resolution P1 Threaded course Q&A with mentor escalation and a support-ticket path for unresolved questions.	● DELIVERED

Onyx Code Lab

5 of 5 requirements · all delivered

LAB-01

Browser IDE P0

Multi-language in-browser editor with syntax highlighting, run controls and an interactive console.

● DELIVERED

LAB-02

Sandboxed Execution P0

Isolated, resource-limited execution environments that run learner code safely at classroom scale.

● DELIVERED

LAB-03

Automated Code Evaluator P0

Test-case based grading with hidden tests, partial scoring and instant feedback on submissions.

● DELIVERED

LAB-04

Guided Practice & Problem Bank P1

Curated problem sets organized by topic and difficulty with progressive hints and worked solutions.

● DELIVERED

LAB-05

Project Workspaces P1

Multi-file project spaces with snapshots and mentor review to move learners from exercises to real builds.

● DELIVERED

Onyx Assess 4 of 4 requirements · all delivered

ASS-01	Timed Assessment Engine P0 Scheduled, timed tests drawing from randomized question banks with configurable rules and sections.	● DELIVERED
ASS-02	Remote Proctoring P0 Camera and screen monitoring with tab-switch detection and reviewable integrity flags for each attempt.	● DELIVERED
ASS-03	Auto & Manual Grading P0 Automatic objective scoring alongside rubric-based subjective grading with a moderation workflow.	● DELIVERED
ASS-04	Results & Analytics P0 Score reports, item analysis and cohort benchmarking with exportable results for stakeholders.	● DELIVERED

CAR-01	Hackathons & Contests P1 Host timed events with team formation, leaderboards and structured judging to spark applied learning.	● DELIVERED
CAR-02	Mock Interviews P1 Scheduled practice interviews with structured feedback and optional recording for later review.	● DELIVERED
CAR-03	Skill Certificates P0 Verifiable, shareable certificates with unique credential IDs learners can present to employers.	● DELIVERED
CAR-04	Placement & Employer Portal P0 Job posts, applications, shortlisting and drive management connecting institutions with employers.	● DELIVERED
CAR-05	Employability Profile P0 A portfolio and skills passport with a readiness score that summarizes each learner's job-readiness.	● DELIVERED

CMP-01	Academic Administration P0 Programs, batches, timetables and faculty allocation managed from a single institutional console.	● DELIVERED
CMP-02	Examination Management P0 Exam scheduling, hall and seating plans, marks entry, moderation and result publication end to end.	● DELIVERED
CMP-03	Fee & Finance P1 Fee structures, invoicing, online payments, receipts and reconciliation for the institution back office.	● DELIVERED
CMP-04	Parent & Guardian Portal P2 Attendance, results and fee visibility for guardians with notifications on key academic events.	● DELIVERED
CMP-05	Roles, Tenancy & Audit P0 Multi-tenant isolation, role-based access control and audit logging as the platform's secure foundation.	● DELIVERED

Beyond the Proposal

33 capabilities the product has today that no requirement above asked for — found while building and verifying it, not billed as separate items.

A tier the proposal never asked for

- Multi-institution operator console
- Two sign-in doors, properly separated
- An operator floor that cannot be removed
- An operator can run a customer's institution for them
- Platform audit log, distinct from institutional audit
- OAuth client registry

Integrity engineering past what was promised

- Parallel papers that rotate down the register
- An adjudication trail with a name on it
- Per-examination device requirements, monitored live
- Seat allocation and downloadable scripts
- Weighted integrity scoring, not a flag list
- Consent captured before the paper opens
- Anonymous marking and a moderation gate

Credentials that survive scrutiny

- Revocation that keeps answering
- Public verification, with no account needed

Commerce beyond institutional fees

- Live Classes — paid cohort programmes
- A complete public storefront
- Courses sold individually
- Payments plumbing (gateway + webhooks)

Learner experience past the brief

- A readiness score that shows its working
- An opt-in public profile
- Resolution semantics in discussions
- A resume builder
- Rotating-QR attendance as an anti-proxy control
- A web-page problem type in Code Lab

Quality engineering added during delivery

- 339 automated checks against the live product, every release
- A build that fails on the one defect this product repeated most
- An accessibility sweep (axe-core) across every core screen
- An API reference that cannot lie about its own guards

Governance and operations

- A live permission matrix per institution
- Section lifecycle management
- Institution self-service settings
- Dark theme across the whole product
